1 Introduction

1.1 The 2008 National Hands-Up Survey

The 2008 National Hands-Up Survey is the first national dataset to look at mode of travel to school across Scotland. The survey is a joint project between School Travel Co-ordinators working in Scotland and Sustrans. The 2008 survey was the first time the survey was conducted and all Local Authorities were invited to collect data. The National Hands-Up Survey will run continuously on an annual basis in the autumn of each year.

Data collection was conducted by schools, instructed by their School Travel Co-ordinator with support from Sustrans. Data collection took place on one day over the time period of one week, between the 8th and 12th September. The question asked in the Hands-up survey is, 'How do you normally travel to school?', with the response options: Walk, Cycle, Scooter/Skate, Park and Stride (drive part of the way and walk the rest), Driven, Bus, Taxi and Other. Completed forms were returned by the school to the School Travel Co-ordinator, with completed datasets returned to Sustrans. Overall collation, analysis and reporting have been conducted by Sustrans' Research and Monitoring Unit.

1.2 Sample size

All Local Authorities were invited to take part in the National Hands-Up Survey. During 2008, 29 Local Authorities participated. The total sample comprises of responses from 396,377 children across Scotland.
